LANGUAGES

English – Fluent
Hindi – Professional
Kannada – Native

CERTIFICATIONS

Coursera – Data Science
Coursera – Python
Coursera – ML

SKILLS

Python, C, C++, SQL
HTML, CSS
Pandas, NumPy, Excel
MySQL
Git, GitHub, Jupyter
Machine Learning

SUMMARY

Highly motivated Computer Science Engineering undergraduate specializing in Artificial Intelligence and Machine Learning, with strong foundations in data analysis, programming, and software development. Skilled in working with structured datasets, building efficient applications, and extracting meaningful insights through visualization and analytics. A quick learner who adapts rapidly to new technologies and thrives in collaborative environments. Seeking entry-level opportunities as a Data Analyst, AI/ML Engineer, or Software Engineer.

EDUCATION

Bachelor of Engineering in Computer Science Engineering Maharaja Institute of Technology, Mysore

PROJECTS

Data Analysis Project

- Collected, cleaned, and processed real-world datasets using Python and Pandas using Python and

Performed exploratory data analysis (EDA) to identify patterns and trends.

- Created meaningful data visualizations using Matplotlib to support data-sifweri decialon making

Improved data qualify and accuracy through preprocessing techniques.

AI & ML Project

- Developed e models using machine learnin algorithms such as regression and classification (EDA)

Fine tuned models to improve sccuracy and evaluated performan- ce using metrics such as precision and recall

Applied hatural Language Processing (NLP) techques to analyze and derive insights from loidual data.

Software Development Project

- Designed and developed mo/ular apppplcs using Java, and Python using. Java, and Python
- Followed Object Oriented Programming (OOD) principles for scalat- ble design.
- Improved code readability, performance, and maintainability using structured programming.

Graphic Design Projects

- Created visuaily appealingie banners and posters using. Adobe »thot- zohop and Hustrata« (ESSS)
- Developed digital marketing materials and social media graphics to engage users
- Worked on freelance design projects to enhance branding and visual idenity for clients
